

WE'RE EMERCOM

WE'RE DIFFERENT!

What differentiates our 2019 Emergency Elevator Communications Solution from the others:

» Fully Code Compliant

- Flexible camera position to enable an unobstructed view of the entire elevator floor (including the threshold) as required by ASME A17.1-2019/CSA B44:19 Safety Code for Elevators and Escalators

» Non-Proprietary Components and Systems

- Work with site Internet and Ethernet modules (battery back-up required)
- No monthly recurring fees
- Open selection of elevator monitoring service

» Privacy Secured

- Enhanced security from hackers

» Simplified Installation & Configuration

- Learn Mode wizards (You don't have to be an IT guru!)
- Firewall friendly

» Intuitive Operation

- Minimum training for installers, end-users and monitoring centres

» Meticulously Engineered Battery Back-Up and Self-Diagnostics

- Be confident your system works when mains power is lost

» Premium Support

» Redundancy

- The email and video transmissions are on one communication medium while the messaging and audio are on another

» Graphical Troubleshooting

» End to End Phone Line Verification Covering All Phone Line Technologies

- Legacy analog to modern day VoIP
